Tips and Information

These tile have a very wide natural color range. Mix all boxes before installation.

Sealing before Grouting - use a commercial matte tile and grout sealer

Sealing this tile before grouting will help the grouting and cleanup process. Test small area to verify results.

Grouting - use a sanded modified polymer grout

Clean tile immediately with clean water and remove any grout residue.

Final Cleanup - use a commercial grout residue remover

If a grout haze remains after tile and grout are thoroughly dry - several days - purchase a grout haze removal product
Carefully follow the manufacturers directions.

Final Sealing - use a commercial matte tile and grout sealer

Sealing the grout will help maintain the color and make cleaning easier. The tile can be resealed at this time also.

Always use premium quality products and refer to the manufacturers directions.
